

09.01.2023 Whole School Assembly: Making the impossible, possible

Making the impossible, possible.

There are many times we face challenges in school and we doubt ourselves. This is perfectly normal!

What counts is how we react and meet those challenges. In assembly today we thought about how we can change our mindset and think about what we can do to change 'can't' into 'can'. Learning to think about our own thinking, approaching the problem with not 'if' but 'how'. Find another way. To demonstrate this, some children had a go at the potato challenge! The task was to push a paper straw through a potato - it can be done! We just needed to think differently and together we made the impossible possible.

Can you put a straw through a potato?
