

## 21.02.2023 Whole School Assembly: Classroom Expectations

**READY**

**RESPECTFUL**

**SAFE**

What is a classroom?

The children were given time to think and explain. Is it always somewhere where we sit down? With desks and tables?

We broke the question down together and thought about the different possibilities. In the end we agreed, a classroom is a space available for the children to use. In this case

Break it down. Class - children

Room - a space available for activity

What spaces are used by children in school? We brainstormed questions to answer:

What is a classroom? What about during PE? What about during assembly? What about when eating your lunch?

What about transitions from English to art? From registration to assembly?

Corridors, playgrounds, halls, toilets. All classrooms because by our definition they are spaces used by our children.

Expectations in those classrooms? Expectations of each other? What do teachers expect of you in the classroom? We all discussed together.

Corridors and on the stairs, in the toilets - these are classrooms also, the same expectations apply as when we are sat at our desks. They are narrower, smaller, involve lots of movement. So we need to take care. Children are working as we travel around school. Be respectful of them. Respect the environment that we are in.

We finished by shouting out to classes who had caught the eye of the staff for the fantastic way they came into assembly.
